Projects

- Produced +40 projects using HTML, CSS, Bootstrap, Ruby, Ruby on Rails, Javascript and React & Redux

PROJECTS

Bookstore React & Redux

[Demo](#) [Source](#)

Built the front-end of an application where a user can manage the bookstore by adding, removing books and filtering by categories using redux to control the state.

Social Media Ruby on Rails

[Demo](#) [Source](#)

Facebook based social networking application with full CRUD functionality. Built models, views and controllers for users, posts, comments, likes, and friendships. Unit and integration tests using RSpec.
